

“IEI Science Club: Science everywhere...”

*To say is easier but to do requires determination and a will to do
IEI Science Club has always taken the road to do and to do with
meaningfulness!!*

The IEI(Institution of Engineers India, Kuwait Chapter)’s Science Club began this year’s scientific journey in a unique manner.

“I hear and I forget. I see and I remember. I do and I understand”- With these thoughts reverberating in the backdrop the IEI, Science Club members met in the afternoon of June 3rd,2011. The objective was to learn the basics of science and everyday science by sharing and finding newer means.

The meeting was coordinated by Astrid Jerald and he began the scientific journey by introducing the participants. This was followed by a comical skit by Simran Gulati, Aryan Tiwari and Manik Gulati, highlighting the importance of the principles of science in day today life. This was taken over by a fabulous experiment using a dynamo and a plastic bottle by two budding scientists, Siddhant and Sambhav Jain. The presentation skills of each of the participant was quite noteworthy. Pavithra Kumar, the editor for the month, then briefed all about the Science club Journal. Andrew panicker entertained us by enriching us

on the scientific rationale behind simple things through a video presentation.

And finally the exciting and stimulating afternoon filled with queries, experimentation and debating came to a solemn end and Pooja Gopikrishnan gave the vote of thanks . As the members were leaving the premises , each one had enough food for thought and a realization of a well spent Friday afternoon!!
